 Excellent evaluation of TechWatt's situation and 'role playing'.
 However the focus deviated from VM and RM to the project brief which was not a requirement for this assignment.

Excellent role-playing as URM consultants and an extremely well thought-out report. The only hitch: you exceeded the 2500-word limit. Could be further improved by adding a table of contents, pushing all the 'details' into appendices and perhaps using a covering letter. A very good effort nonetheless.
